To meet the needs of the emerging elementary-aged child, who is entering a new stage of development, the Montessori elementary programme differs significantly from the Montessori Casa dei Bambini programme. Children at this stage enter the “Age of Reason” and undergo a transformation in their peer relations. For these reasons, it is crucial for parents to understand the new academic and social environment at the Elementary level. As an introduction to Montessori elementary programme, we are including a video link to the following North American Montessori Teachers Association video:

We look forward to seeing you at these upcoming events. Please let me know if you have any questions.

Warm Regards,

Miguel Buñag
