。

瑪利亞·蒙台梭利在《發現兒童》書中提到：寫作的必要條件是有所謂的"堅定的手，那就是意志力控制下的手。"

蒙台梭利博士指出，能夠書寫的手包括持筆的動作和描畫每個符號形狀的動作。我們都知道在生命的前三年非常重要，因爲這個時間是孩子動作習得以及動作建構的時期。

動作的發展與我們的心智和大腦發展相關聯。動作的學習是需要我們花費很多的努力。我們需要不斷地重複，不斷地練習，以使得我們做出相應動作的這些肌肉都能夠在一起統一的運作。

在我們準備好的 0-3 環境中，孩子每天通過日常生活的練習：擦皮鞋、拼貼畫、衣示框等工作發展了動作協調的能力（手眼協調，大肢體動作協調，手指精細動作等）來預備書寫的手。當來到 3-6 歲的環境後，就會有相應的書寫工具幫助孩子進行書寫練習。

這個月，孩子們在建構自己的同時，也體驗了中國新年的傳統文化。我們知道，主題教學在蒙台梭利的環境中是融入了整個完備環境當中的。他們通過各種活動（新年物品名稱認知、歌曲童謠唱讀、手工剪貼、故事等）來感受中國新年的氣氛。

馬上就要迎來虎年，在此，我們預祝大家虎年吉祥！期待假期後孩子們的歸來！

"A necessary condition for writing is to have what is called a "firm hand," that is, a hand under the control of the will."

~ Maria Montessori, The Discovery of the Child

Dr. Montessori noted that writing involves both the action of holding a pencil and the action of drawing the shape of each word symbol. We all know that the first three years of life are very important because this period is the period of motor acquisition and motor construction in children.

The development of movement is linked to our mental and brain development. It takes a lot of effort to learn movement. We need to keep repeating, keep practicing, so that the muscles that we make the corresponding movements can all work together in unity.

In our prepared Foundation environment, children develop their motor coordination (hand-eye coordination, gross motor coordination, fine motor skills, etc.) to set them on the path for later writing.

In addition to this preparation, the children are also absorbing culture and the stories that will later fill their writing. This month, the children experienced the traditional culture of Chinese New Year! They experienced the atmosphere of Chinese New Year through various activities such as learning the names of New Year items, singing songs, nursery rhymes, stories, and hand-crafts.

Soon we will usher in the Year of the Tiger! We wish you all auspicious Year of the Tiger and look forward to the return of the children after the February holidays!
